## TO CROSS OCEAN IN A MOTORBOAT OF ONLY 35 FEET

Thomas Fleming Day Plans to Outdo His Voyage Last Year in Yawl.

QUEENSTOWN HIS PORT.

Will Carry 1,000 Gallons of Gasoline and Keep in the Steamship Lane.

The latest project of Thomas Fleming Day, editor of the Rudder and most ome of yachtamen, is to ata voyage across the Atlantic Ocean in a X-foot motorboat He sailed last year from Providence, R. L. save for the test of seamanship, this was not such a feat as the propose motorhout trip, for the Atlantic had been crossed in small sailing craft be-

Mr. Day expects to start either from Boston or New York during the latter part of this month to traverse waters in which a motorboat keel has never left a track. Queenstown, Ireland, is the port of destination selected by Mr. Day, and the voyage will be doubly along the steamship lane and the motoroat will be but a speck on the waves of the Atlantic.

The boat selected for the trip is the Detroit, built by the Matthews Boat Company of Port Clinton, O., and owned W. E. Scripps of the Detroit Motor boat Club. Although but 16 feet long, struction, with a tank capacity for 1,000

EXPECTS TO MAKE 140 MILES A DAY. Theoretically 1,000 gallons of gasotine will run the Detroit steadily for 2 days. Her speed is about 5 nautical miles an

loaded and 6 nautions miles an light. Mr. Day figures she will cover in ocean travelling an average of 140 miles a day, so he gives himself very ittle margin for emergencies. The Detroit is # feet 8 inches on the

water line, 9 feet beam, 4 feet 7 inches draught when loaded, 5 feet 9 inches free draught when loaded, 5 feet 5 mehes free-board at the bow and only 2 feet 6 inches freeboard at the point where she sets lowest in the water. Her freeboard aft is 6 feet. For ballast she carries an iron shee weighing 1,500 pounds and her total displacement in 5,000 pounds. She is equipped with a 5-foot must and an americant and an american state of the state of the set.

a cabin forward for the feet six inches long and with ad room. The stores are to midships and the engine is gaining some of her former glory—lost for a time while she served as a floating prison for Australian convicts—by

passing steamships. In his

GIANT OIL GUSHER ABLAZE.

GIANT OIL GUSHER ABLAZE.

Plames Sheet High in A4r as Pire which service late yesterday in the engineration of Well No. 3 of the Buck Oil Company, near Bellows, ignited a 7,000-barrel gusher of the Pacific Crude Oil Company a hundred feet away. Two foot-barrel tanks are within fifty feet of the blazing gusher and a hundred feet distant is a well known as No. 2. These may be destroyed.

The flames from the gusher to-day were mounting hundreds of feet in the air and can be seen plainly from Taft, seven miles away. The gusher came in last Thursday and had acturated the ground for many yards, making head way easier for the fire. The flames spread to the bunk houses and other buildings. It is believed the well will burn for many days. The origin of the blaze is not known.

ELVIDDING MEMS. formed the peaceful merchantman into the degraded thing which aptly exem-plified "man's inhumanity to man," re-constructed the "tween decks section and hold, which had borne the craved
